

## **Convert fasta files to one line text files**

Source code: `convert_fasta_to_text.cpp`

Example input file: `test.fna`

Example output file: `test_out.txt`

### *Instructions:*

1) Compile source code to app called `converter` using the line command:

```
g++ convert_fasta_to_txt.cpp -o converter
```

2) Run `converter` program by invoking the following line command:

```
./converter < test.fna > test_out.txt
```
